1. Introduction

1.1 Scope

1.1.1 In Scope

- Login functionality (valid/invalid credentials)
- Search for products and apply filters
- Cart functionality (add/remove/view products)
- Checkout navigation (simulation, no real payment)
- Logout functionality

1.1.2 Out of Scope

- Payment gateway testing
- Prime membership features
- Seller/Admin pages
- Third-party integrations (AWS, external services)

1.2 Quality Objective

- Ensure Amazon website core functionalities work as expected.
- Identify defects and report professionally in JIRA.
- Maintain high test coverage and proper documentation.

1.3 Roles and Responsibilities

- **Tester:** Sanampreet Kaur – Create and execute test cases, log defects, prepare test summary.
- **Reviewer/Manager:** N/A (personal project)

2. Test Methodology

2.1 Overview

- Manual testing using **Zephyr Squad** for test case management.
- Defects tracked in **JIRA**.
- Focused on **functional testing** and **black box testing** techniques.
- Testing types include Functional Testing, Smoke Testing, Regression Testing, and Exploratory Testing.

2.2 Test Levels

- Functional Testing – Main focus.
- Integration Testing – Only for dependent modules (e.g., search + cart).

2.3 Bug Triage

- All failed test cases logged in JIRA.
- Severity/Priority assigned: High (login/cart), Medium (search/filter).

2.4 Suspension Criteria and Resumption Requirements

- **Suspension:** Website unavailable or features inaccessible.
- **Resumption:** Website accessible and environment ready.

2.5 Test Completeness

- All planned test cases executed.
- All major defects logged.
- Test summary report prepared.
- All critical defects are retested and closed or documented.

3. Test Deliverables

3.1 Before Testing Phase

- Test Plan Document
- Test Scenarios list (Excel or Zephyr Squad)

3.2 During Testing

- Test Cases executed (Zephyr/Excel)
- Bug Reports logged in JIRA
- Screenshots of failed test cases

3.3 After Testing Phase

- Test Summary Report
- Completed Zephyr test execution reports
- GitHub repository with all files

4. Resource & Environment Needs

4.1 Testing Tools

- **Zephyr Squad** – Test case management
- **JIRA** – Defect tracking
- **MS Excel** – Optional backup
- **Browser:** Google Chrome

4.2 Test Environment

- **Operating System:** Windows 10

- **Internet Access**
- **Amazon website**
